

It is our understanding that the FCC could preempt our current Indiana Law that has diminished us receiving unwanted telemarketer calls. We are currently gone a great amount of hours at work and now enjoy our evening without answering calls that we did not want. Our quality of life has extremely improved since we placed our phone on the no call list in Indiana. It would be a great shame if our lives would suddenly be interrupted again to answer these needless calls. We are asking to allow Indiana to continue serving their residents with this great law. Thank you.
